

# Comparison Table of Top-Running vs Under-Running Cranes

| Feature            | Top-Running                        | Under-Running                      |
|--------------------|------------------------------------|------------------------------------|
| Load Capacity      | Up to 100+ tons                    | Generally up to 40 tons            |
| Support Structure  | Requires columns/runway beams      | Generally suspended runway system  |
| Hook Height        | Varies on runway suspension height | Varies on runway suspension height |
| Floor Space Impact | Requires columns if freestanding   | Minimal impact when roof-supported |
| Span Capability    | Wide spans possible                | Narrower span range                |
| Installation Cost  | Higher (due to structure needs)    | Economical (depending on supports) |
